

GLOBAL SUPPLY CHAIN LOGISTICS

Projects, Oil & Gas Logistics

Industry Challenges

In today's market conditions, every shipment requires extra care. This is especially true for shipments within the Projects, Oil & Gas arena.

These shipments are complex by nature - there is no one size fits all approach. Every shipment is different; each with their own set of challenges and obstacles to overcome. Heavy-lift, out of gauge cargo moves and marine services require precise, specialized services. Today's ever-evolving platform of global regulations and geopolitical uncertainty only adds to the complexity of such shipments.

"The confidence and security of working with a local provider with the strength of a global company is an important value-added element."

-Bimbo de Colombia

The PSA BDP Experience

No project is too big or too small for PSA BDP. Our global presence spans over 135 offices in 40 countries around the world, and is built upon a foundation of providing the highest echelon of service to our esteemed customers. We are proud to maintain a nimble, small-company culture of service, and our team members are well-versed in both the local and global regulations and requirements.

Delivering unparalleled industry experience.

PSA BDP's global Projects, Oil & Gas teams are experts in the intricacies of this vertical.
